

# BCBC 30<sup>th</sup> Anniversary Edition

---

## Renewing our life with BCBC Cloud

Kwong Yiu Wong

The theme of the year is: Renewing Our Life to Climb A Higher Peak

I have setup a WD My Cloud at our church which you can access anywhere using your PC, Phone/iPad, Android phone/tablet. The target is to make use of the BCBC Cloud storage space to serve our Lord more efficiently.

Here are the objectives for the Cloud usage:

1. As the 30th BCBC Anniversary is coming, we can make use of the BCBC Cloud storage to share our past, present and future.
2. We can also make use of the storage to record our experience to pass to new generations, new executive board, etc.

To achieve these objectives, the storage space was mainly separated into the following sections:

1. Public - It contains folders BCBC, Shared Music / Pictures / Videos.
2. Semi-private - It is shared by Pastors, Elders and the members of the Executive Board.
3. Private - This is the temporary space for each user.

In the Public BCBC folder, I created some sub-folders:

- Activities
- Constitution
- Fellowships
- Logo & Theme
- Directory
- Membership Meetings
- Worship
- Yearbooks

In the Semi-private BCBC folder, I created these sub-folders:

- Budget
- Contracts
- Departments
- Executive Board
- IT
- Pastors
- Personnel

I have created user accounts for the pastors and the members of the Executive Board. For other members or guests, I have created a member account for everyone to access. Here is the login information to access the BCBC Cloud Public data area:

<http://www.mycloud.com/>

User: member@bramptoncbc.org

Password: Welcome2

In Addition, free Apps called "WD My Cloud" and "WD Photos" are available in Android and Apple Store to access the drive.

As new technologies are changing rapidly, I hope we can become the master of the new technologies, and not to become the slave.
